Dear Rick,

August is that late summer month where everyone takes advantage of the last few weeks of summer to get work done, take a vacation, or simply have some fun close to home. We hope you continue to play laser tag outdoors as much as you can before the cooler weather sets in. This month, we have several exciting things to report. Our revamped websites are nearing completion, new marketing materials for field owners are available, and the Eagle Eye gets put to hard use. Please be sure to visit our pages if you haven't already. They are a great way to stay in the loop. Follow us today!

Also important to note is the upcoming release of the new CCM and gun software. Several bugs are fixed and playability is easier. A special bulletin will be put out detailing the fixes and new features when the software is released.

The New Look of Predator Games Online

You may have noticed the exciting new look of www.predatorgames.net, the online players community tracking scores and other information. Following the same design trend, www.predatorgames.info has been launched this past week. This help site focuses on keeping users up and running by supplying a wealth of information such as documentation, instructional videos, marketing materials, and more! Be sure to check out this ultimate help site. Last, but not least, the all-new www.predatorgames.com is expected to launch in August. This informative home page will feature product info, media, and the Feature Field page. Check back frequently for the update.

If you would like to be selected as a featured field, email social@predatorgames.com with the subject "FEATURED FIELD." A short questionnaire and info sheet will be sent to you to fill out. Return it and your field will be featured during an upcoming month!

New Marketing Materials for Field Use

As mentioned above, Predator Games has released a brand new portfolio of edited product images for marketing use. They include vivid photos of the Eagle Eye, Barracuda, and CCM. If you're designing an ad, webpage, or something else, these images are perfect. You'll show potential customers clear-cut, professional shots of the equipment you use. Don't settle for a sub-standard, low-res photo when you can have all these for free. To download the JPEG images, simply head to www.predatorgames.info and click on marketing.

Paintball Training with the Eagle Eye

The Siege paintball team in Mukwanago, Wisconsin recently held a practice using the Eagle Eye system. After setting up their markers and a brief orientation, the players ran two hours of non-stop drills and games. The Eagle Eye system allowed the players to save money by not buying paint and realistically work on their skills. It was a fun way to practice by doing something different. Two on two games were run using a variety of custom game types. By the end of the practice, the players were tired yet excited. For a slide show of the practice, click here: <http://ping.fm/bHOta>.

Find out how your paintball team or field can benefit from the Eagle Eye system by heading to www.predatorgames.com or www.paintballlasertag.com.

Field Spotlight - Chaos Paintball

Chaos Paintball out of Red River, NM began this past June and offers a little something for everyone. They offer paintball as well as laser tag for the younger crowd. Visitors not wishing to get painted up or feel the pain are also welcome to try laser tag. Both are played on the speedball field so the experience is virtually the same! While primarily featuring a speedball course, Chaos is planning to open a woodsball field for more variety. More future plans include go karts, an intuitive website, and portable fields. These portable fields will be used for large events and birthday parties. The host can choose to have lasertag or paintball depending on their crowd.

For more information on Chaos Paintball, call 918-399-0002. You may also email them at autocrafters@att.net

If you would like to be featured in the next field spotlight, please email us with subject "Field Spotlight" and leave a message with your contact information. Someone will contact you for more information.

Did You Know?

The sun has powerful infrared rays that can affect laser tag guns and equipment. Most laser tag guns emit a beam of light and work best indoors. The infrared from the sun messes with the receiver on some units and also dilutes the actual beam of light being shot. Predator systems use highly advanced electronics to overcome most of these problems. You can definitely get more range from your gun on a cloudy day, but even a bright, cloudless day won't ruin your fun.

Why Do You Like Predator Games Paintball Laser Tag? Submit Your Reason and Win!

Share your excitement! Tell us why you like Predator Games paintball laser tag so much for a chance to win a Predator Games t-shirt and dog tag!

Simply email social@predatorgames.com with a few sentences describing why you like our products and the game. Be sure to put subject as "August Contest." The best entry we receive will be declared the winner! All entries must be received by August 31, 2010.

Winners will be emailed with details and mentioned in the next newsletter. Good Luck!

Discounted Units For Cheap!

Tippmann has informed us they have a limited supply of the older version Eagle Eyes for sale at a discounted price. These units have an older case design and use two batteries instead of four. They are compatible with all current units and the CCM. For field owners looking to save money, this is a great bargain.

For more information and to order, contact your Tippmann sales rep and ask about the discounted older Eagle Eyes.

Sincerely,

Predator Games
