

Command Center Module (CCM)

CONGRATULATIONS on the purchase of your new Predator Games Command Center Module (CCM). The CCM allows you as a field owner or game master to quickly setup and manage games on your field, remotely control units in play, download an unlimited amount of scenario games, easily update your field unit software, and most importantly upload player scores to the Predator Games Global Network (PGGN). Our goal is to make the operation of this software easy for you as a field owner so that you can get your customers out and playing quickly while providing them with games that keep them coming back for more.

System Requirements

The following represent the minimum system requirements in order to install the CCM software on your computer.

- You must have an active internet connection
- It is assumed that you have a working knowledge of Microsoft Windows
- Supported Operating Systems: Windows Vista; Windows XP
- .NET 3.51 must be installed on your system. This program is on the installation disk included with your CCM package. It will automatically install if needed.
- Processor: 400 MHz Pentium processor or equivalent (Minimum); 1GHz Pentium processor or equivalent (Recommended)
- Hard Drive: Up to 500 MB of available space may be required
- Memory: 96 MB (Minimum); 256 MB (Recommended)
- Video: 800 x 600, 256 colors (Minimum); 1024 x 768 high color, 32-bit (Recommended)
- CD or DVD Drive
- Updates: All updates are downloaded for FREE from www.PredatorGames.com to your CCM.

Installation

Please follow the steps below in order to install the CCM software onto your computer.

- The CCM software should be installed before you plug in your CCM server. Make sure at this point that the CCM server is NOT plugged into your USB port.
- Put the CCM software CD into the CD drive of your computer.
- On most computers the installation program will automatically start. If you have this function disabled on your computer you will need to run the *SETUP.EXE* file found in the *OUTPUT* directory on the CCM software CD.
- The installation program will guide you through the installation process. Depending on your operating system and what software components your computer already has installed, the installation process may take several minutes. In general the installation program will install the CCM application and the drivers for the CCM Server. In some cases it may also need to install .NET 3.51 and the Access 2007 Database Engine.
- When the installation is complete you will be able to access the CCM software by either double clicking the CCM Icon on your desktop or by going to the CCM directory by clicking on your Start button.
- The CCM User Manual can be downloaded from two different locations:
 - o Once you have started the CCM software please click on the *HELP* item under the *ABOUT* menu item.
 - o You may download the manual in PDF format by logging into www.PredatorGames.net and visiting the *DOWNLOADS* section.
